

Trumatic E 2400

The Trumatic E 2400 is both compact and flexible. This unit is compact and requiring very little space but at the same time gives you 2,400 W of heating power. The heater can be installed in practically any position and is 100% automatic thanks to the electronic control unit (included).

Included with this heater is a thermostat, control panel, 4m cable and a mounting kit.

Key Features include:

- Maintenance free operation
- Low electricity consumption
- Flexible installation positions
- Ideal as auxiliary heater
- Electronic control unit
- Also available for use with natural gas
